Recommendations

We highly recommend the following best practices to be followed

1. Use clean and stable power supply for the control system, by mandatorily using a stabilizer or UPS for control system and the same shall be provided/sourced by the customer
2. Use stable Wi-Fi connection/ good quality routers for seamless network performance
3. Use good quality standard dimmable drivers/ballast for lighting control
4. Ensure the site is ready as per the site readiness guidelines, before the start of installation

Product Delivery

Product delivery

Within 15 days from receipt of the Purchase Order and advance payment

Installation commissioning and execution

This will depend on project size and availability of site readiness. However, we assure minimum turnaround time
